EDUCATION

K.I.E.T GROUP OF INSTITUTIONS, GHAZIABAD (2016 - 2020)

B.Tech in Computer Science (81%)

HIGHER SECONDARY (12TH)

Ram Kishan Institute, Ghaziabad (2015) – 82%

SECONDARY (10TH)

Ram Kishan Institute, Ghaziabad (2013) – CGPA 9

SKILLS

- Languages & Frameworks: C#, C++, ASP.NET MVC, ASP.NET Core, .NET 8, JavaScript
- Architecture & Practices: REST APIs, System Design, Agile
- Databases: SQL Server, MySQL, Elasticsearch
- Messaging: ActiveMQ
- Cloud & DevOps: AWS, Docker
- Tools: Git, Bitbucket, Jira, Confluence, Azure TFS
- Integrations: ADP, CSOD, iCIMS, Workday, Kenexa, SmartRecruiters, Ultipro etc

PROFILE

Senior Software Engineer with 6+ years of experience designing and developing enterprise-scale applications using C#, .NET 8, ASP.NET Core, AWS, Docker and REST APIs. Proven track record of building scalable backend systems that process millions of candidate transactions annually. Experienced in containerization with Docker, system performance optimization, and asynchronous programming. Strong understanding of object-oriented programming (OOP), design patterns, multithreading, Agile methodologies, and modern software engineering practices.

WORK EXPERIENCE

SHL India Pvt. Ltd.

Projects

TCI (Talent Central Integration) 2020 - PRESENT

- Built a multi-tenant integration platform by refactoring a large-scale monolithic application, connecting 30+ ATS systems and supporting millions of candidate transactions annually.
- Designed and developed 15+ scalable web modules using ASP.NET MVC/Core and C#, improving system extensibility
- Developed and deployed 40+ RESTful APIs using .NET Core and Entity Framework, serving high-throughput enterprise clients
- Collaborated with product, QA, and ops teams (10+ stakeholders) to deliver feature-rich releases on sprint timelines
- Leveraged multithreading and asynchronous programming (Task Parallel Library, async/await) to improve application throughput, reduce response time, and efficiently process concurrent requests.
- Tech Stack: ASP.NET Core, MySQL, Elasticsearch, ActiveMQ
- End-to-end ownership: registration → test delivery → scoring → report synchronization

SHL Online Portal

- Contributed to an ASP.NET + React.js assessment platform used by thousands of candidates daily
- Dockerized 5+ services and deployed them on AWS ECS, improving environment consistency and deployment reliability
- Achieved 100% unit test coverage for critical modules using NUnit, reducing production defects by ~40%
- Participated in peer code reviews and CI pipeline improvements, improving overall code quality and release stability

Talent Intelligence (AI-driven Internal Hiring Platform)

- Conducted a POC for Matomo Analytics, enabling user behavior tracking and adoption insights without third-party data leakage
- Integrated analytics using Tag Manager and embedded scripts, improving visibility into internal platform usage
